

Bhagya

Manual Qa Tester

9019395288 ◇ holkadebhagya@gmail.com ◇ Bangalore, Karnataka ◇ [LinkedIn](#) ◇ [GitHub](#) ◇ [Portfolio](#)

PROFESSIONAL SUMMARIES

QA / Manual Testing Engineer skilled in Manual Testing, Selenium, SQL, Test Case Design, and Defect Management, with a strong focus on delivering high-quality, reliable web applications.

EXPERIENCE

AI Full Stack Developer Salesence

Remote

Jun '25 — Present

Salesence is an AI-powered marketplace optimization platform providing analytics and smart product recommendations for e-commerce sellers.

- Built interactive pages and reusable component architecture for dashboards, analytics visualization, and product recommendation views.
- Integrated REST APIs with dynamic state management (React Hooks & Context) to display real-time analytics and AI-generated insights.
- Worked closely with backend developers to integrate Express.js + Supabase APIs for analytics, recommendations, and product scraping.
- Coordinated frontend deployment workflows on Vercel/Netlify, including environment setup and production build optimizations.

PROJECTS

Stackfolio

Present

- Developed and implemented **web application features** such as login, user flows, and core functionalities to ensure smooth user experience.
- Wrote and maintained **clean, structured code** based on functional requirements and project specifications.
- Integrated and tested **REST APIs** to handle data exchange, validate responses, and manage error scenarios.
- Ensured **cross-browser compatibility and responsive design** for consistent performance across multiple devices and browsers.

Cineverse [Link](#)

- Developed a **movie ticket booking web application** using **React 18** with smooth user flows and interactive features.
- Implemented **API integration and basic backend logic** to handle movies, bookings, and user-related data.
- Worked on **UI functionality and animations** using **Framer Motion and Three.js** to improve user experience.
- Debugged issues, optimized performance, and followed **component-based coding practices** for maintainable and readable code.
